Projects

Pre-placement Test June'23

Project aims to modernize and digitize the campus placement process, making it more efficient and user-friendly for students, organizations, and the college's Training & Placement Officers.

- Benefits:** Reducing manual work, minimizing paperwork, saving time and money, and improving coordination between students and companies.
- Functionality:** The main functions of project, including student information management, query assistance portal, resume upload, and campus preparation for shortlisting students.
- Technologies Used:** In this case, CSS, Bootstrap, HTML, PHP and MySQL database.

Imagestock June'22

Providing a platform for users to download high-quality images in various categories, such as nature & wildlife.

- User-Friendly Interface:** Designed and implemented an intuitive and user-friendly interface that allows users to effortlessly search for images based on specific categories, simplifying the image discovery process.
- Technologies Used:** In this case, CSS, Bootstrap, HTML, JavaScript, Python and Django.

CA Aug'23

- Blogging web application that provides owners with a platform to create, publish, and manage their blogs. It has gained prominence in the online content creation space due to its user-friendly interface and robust feature set.
- Technologies Used:** In this case, CSS, Bootstrap5, HTML, JavaScript, Python and Django.
